SUMMARY

Immediate Joiner | Aspiring React Front-End Developer with hands-on experience building responsive, intuitive, and user-focused web applications using React.js and modern web technologies. Strengthened practical skills through consistent self-learning and real-world project development. Highly motivated to contribute to innovative, collaborative teams and deliver solutions that enhance user experience and solve real-world problems

TECHNICAL SKILLS

- **Languages:** JavaScript (ES6+), HTML5, CSS3
- **Frameworks/Libraries:** React.js, Mantine UI, Tailwind CSS, Framer Motion
- **certification:** React JS course - SCALER
- **Tools:** Git, npm, VS Code, Chrome DevTools, Netlify
- **Other:** Responsive Design, UI/UX Principles, Debugging, Version Control, Asynchronous JavaScript

PROJECTS

Book Hunt – Online Book Discovery & Wishlist App

- Collaboratively built a full-stack book discovery platform using React.js and Tailwind CSS, allowing users to explore, search, and maintain personalized wishlists through a clean and responsive interface.
- Implemented Firebase Authentication and Cloud Firestore to enable secure user access, protected routing, and real-time storage of user-specific data in the cloud.
- Improved overall user experience by integrating Framer Motion animations and streamlining API interactions with structured loading indicators and error handling.
- Designed modular and reusable components following scalable architecture practices to enhance code maintainability and support future feature enhancements.

PokéPeek Website — React.js

- Built a feature-rich Pokémon search application using React.js and Mantine UI, incorporating real-time REST API calls with organized state handling for smooth data management.
- Created responsive, card-based layouts to present Pokémon statistics, types, and attributes clearly across mobile, tablet, and desktop environments.
- Developed optimized search and filtering functionality to efficiently manage large datasets while maintaining consistent UI performance.
- Implemented structured loading and error control mechanisms to ensure reliability and prevent interface disruptions during asynchronous operations.

Portfolio Website (React.js)

- Designed and developed a professional portfolio website using React.js to present projects, technical expertise, and achievements in a well-structured and recruiter-focused layout.
- Applied responsive design techniques and modern styling approaches to maintain readability, accessibility, and visual consistency across various screen sizes.
- Built reusable UI components and incorporated subtle motion effects to improve engagement and maintain a cohesive design language.
- Deployed and fine-tuned the application for optimized performance, ensuring fast load times, enhanced SEO structure, and accessible content delivery.
